Dr. Marc Van Montagu, Dr. Mary-Dell Chilton, and Dr. Robert T. Fraley

BELGIUM, UNITED STATES, UNITED STATES

Three distinguished scientists — **Marc Van Montagu** of Belgium, and **Mary-Dell Chilton and Robert T. Fraley** of the United States — will share the 2013 World Food Prize for their independent, individual breakthrough achievements in founding, developing, and applying modern agricultural biotechnology. Their research is making it possible for farmers to grow crops with: improved yields; resistance to insects and disease; and the ability to tolerate extreme variations in climate.
